575 nm excitation and 610 nm emission filter
20-220x magnification
To observe TxRed, mCherry

## Popis

The Dino-Lite AM4115T-RFYW digital microscope is optimized for research and viewing fluorescent objects by using 575 nm excitation LEDs. It has a long-pass type 610 nm emission filter that is designed to observe a wide range of fluorophores with applications in developmental biology, pathology, and anatomy.

The AM4115T-RFYW has the capability of switching the light source from the 575 nm

LEDs for excitation lighting to the white LED, which is convenient for locating the object and obtaining an easy focus. All of these factors make the AM4115T-RFYW the smallest fluorescence microscope in the world, capable of many applications and visualizing a vast range of fluorescence.
