AD7013MTL

Marca: Dino-Lite

Código del producto: AD7013MTL

Short Description

5 Megapixel resolution Long working distance 20-90x magnification Robust metal housing Exchangeable caps

Descripción

The Dino-Lite AD7013MTL has a 5 megapixel sensor for crystal clear images, even under higher magnification. Because of the very high resolution, the AD7013MTL is the ideal solution for displaying microscopic images on large screens or using the microscopic images for printing.

The AD series are equipped with exchangeable caps for even more flexibility. The long working distance of up to 15 cm enables the possibility to work under the microscope.
