## Description

**Spécification** 

Lighting

The IriScope Wireless (MEDLW4R) offers a new, fast and easy way to make pictures of eyes. The IriScope Wireless has 2x2 LED's (white/yellow) that illuminate the side of the eye which reduces the reflections in the image as well as the discomfort by bright light. The yellow LED's provide better images of dark irises. The images have a maximum resolution of 1.3 Megapixel.
