## AD4113T-I2V

Marque:

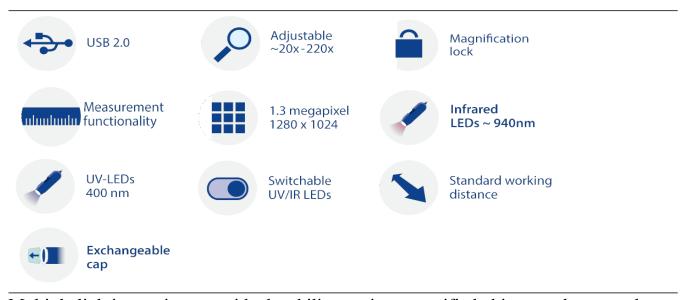

Code produit: AD4113T-I2V

#### **Courte description**

1.3 Megapixel resolution switchable UV/IR LEDs 20-200x magnification With exchangeable caps

#### **Description**

The AD4113T-I2V features both IR (~940nm) and UV (~395nm) LED lighting in a single device.

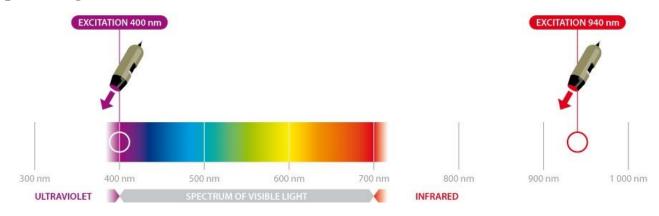

Multiple lighting options provide the ability to view magnified objects under normal

external lighting sources such as white light or under near IR, or UV lighting by simply switching from one to the other. The IR can be use in document examination and new enhanced UV system provides improved fluorescence contrasting for use in forensics, biomedical or machine vision applications.
